
42 C.F.R. § 84.82

Gas pressure gages; minimum requirements.

- (a) Gas pressure gages employed on compressed breathing gas containers shall be calibrated in pounds per square inch.
- (b) Liquid-level gages shall be calibrated in fractions of total container capacity, or in units of liquid volume.
- (c) Gas pressure gages other than those specified in paragraphs (a) and (b) of this section shall be calibrated in:
 - (1) Pounds per square inch; or
 - (2) In fractions of total container capacity; or
 - (3) Both in pounds per square inch and fractions of total container capacity.
- (d)
 - (1) Dial-indicating gages shall be reliable to within ± 5 percent of full scale when tested both up and down the scale at each of 5 equal intervals.
