

## 42 C.F.R. § 431.800

---

### Basis and scope.

---

This subpart establishes State requirements for the Medicaid Eligibility Quality Control (MEQC) Program designed to reduce erroneous expenditures by monitoring eligibility determinations and a claims processing assessment that monitors claims processing operations. MEQC will work in conjunction with the Payment Error Rate Measurement (PERM) Program established in subpart Q of this part. In years in which the State is required to participate in PERM, as stated in subpart Q of this part, it will only participate in the PERM program and will not be required to conduct a MEQC pilot. In the 2 years between PERM cycles, the State is required to conduct a MEQC pilot, as set forth in this subpart.
