

Compliance Today – June 2021

Are we really getting all the correct information from our IT systems?

By Catherine Boerner, JD, CHC

The compliance department relies on information technology (IT) systems to provide the lists of individuals to be assigned to receive the code of conduct and compliance training. These lists of individuals provided are also key to initiate and maintain monthly sanction check screening for the List of Excluded Individuals and Entities and System for Award Management (formerly the Excluded Parties List System maintained and updated by the General Services Administration).
