

U.S. Trade and Technology Controls Basics for Life Sciences Researchers (August 2021)

U.S. Trade and Technology Controls Basics for Life Sciences Researchers (August 2021)

Randy Cook, Senior Managing Director, Ankura.

Stephanie Egensteiner, Director, Compliance & Oversight, Ankura.

2021-08-05

- U.S. trade and technology control-related policies, statutes, and regulations are becoming more stringent and impactful for life sciences researchers
- Tighter requirements and active enforcement related both to life sciences-related technologies and a growing population of non-U.S. prohibited parties indicate a need to understand your risks and responsibilities
- In this webinar, experts will familiarize attendees with the U.S. trade and technology control framework, principal requirements, and critical recent developments most relevant to life sciences researchers and organizations
