Facial recognition rises as threat to data privacy

By Sascha Matuszak

A *New York Times* article[1] blew open the work of Clearview AI, an artificial intelligence start-up that claims to be helping law enforcement agencies solve crimes using facial recognition technology. The article used research from MuckRock[2] and Open the Government[3] — organizations that have collected information on the technology and the agencies supposedly using the software. Another report, by *Buzzfeed News*,[4] dug deeper into Clearview’s claims and found that many of the relationships with law enforcement agencies were exaggerated or fabricated.
