

# Navigating the Challenges of Incident Response

---

Emily Yu, Senior Director of Product Counsel, Roblox.

Abhishek Agarwal, Chief Information Security Officer, Head of IT, Helix Biotech.

2022-05-13

This presentation will discuss challenges and issues that Legal and Cybersecurity may face while identifying, investigating and reporting an incident. We will cover the basics of incident response, as well as provide advanced-level tips. Some of the questions we will address include:

- What's a normal workflow for incident response?
- What is a security incident, and when does it meet the threshold of a data breach?
- What occurs during a technical investigation? How does that contrast with the legal investigation?
- When should a company bring in third-party vendors to assist?
- How do you close out an incident report?
