

## 40 C.F.R. § 1090.1120

---

### PTD requirements for diesel fuel additives.

---

In addition to any other PTD requirements in this subpart, on each occasion when any person transfers custody or title to a diesel fuel additive that is subject to the provisions of § 1090.310 to a party in the additive distribution system or in the diesel fuel distribution system for use downstream of the diesel fuel manufacturing facility, the transferor must provide to the transferee PTDs that include the following information:

- (a) For diesel fuel additives that comply with the sulfur standard in § 1090.310(a), the following statement:  
“The sulfur content of this diesel fuel additive does not exceed 15 ppm.”
