

## 40 C.F.R. § 1090.1330

---

### Preparing denatured fuel ethanol.

---

Instead of measuring every batch, a DFE producer or importer may calculate the sulfur content of a batch of DFE as follows:

- (a) Determine the sulfur content of ethanol before adding denaturant by measuring it as specified in § 1090.1310 or by estimating it based on your production quality control procedures.
