

40 C.F.R. § 1090.510

Diesel and distillate fuel produced from TDP.

- (a) A transmix processor must not use any feedstock other than transmix to produce TDP.
- (b) A transmix processor must demonstrate that each batch of diesel fuel or distillate fuel produced from TDP meets the applicable standard in subpart D of this part and must comply with all other requirements applicable to a diesel fuel or distillate fuel manufacturer under this part.
