

40 C.F.R. § 1700.26

Graywater.

(a) For discharges from vessels that have the capacity to hold graywater:

- (1) Graywater must not be discharged in federally-protected waters or the Great Lakes.
- (2) Graywater must not be discharged within one mile of shore if an onshore facility is available and disposal at such a facility is reasonable and practicable.
- (3) Production and discharge of graywater must be minimized within one mile of shore when an onshore facility is either not available or use of such a facility is not reasonable and practicable.
