

Report on Supply Chain Compliance Volume 3, Number 8. April 16, 2020

AI applications and solutions for COVID-19

By Sascha Matuszak

Medical sciences-focused online news company STAT [released a list of ways AI can help hospitals deal with COVID-19](#)^[1] on March 31. The guide included measures that hospitals can implement immediately, as well as solutions that health care facilities should consider installing in the future. Below are [some suggestions](#) for the hospitals, as reported by the Becker Hospital Review:^[2]
