

40 C.F.R. § 174.26

Active ingredient of a plant-incorporated protectant created through genetic engineering from a sexually compatible plant.

The active ingredient is exempt if the conditions in paragraphs (a) and (b) of this section are met.

- (a) The active ingredient is characteristic of the population of plants sexually compatible with the recipient plant and is created through genetic engineering from either an insertion of a native gene into the recipient plant as specified in paragraph (a)(1) of this section or a modification of an existing native gene in the recipient plant as specified in paragraph (a)(2) of this section.
