

801 Connecting Data and People for a Bulletproof TPRM Strategy

Joshua Reynolds, Head of Solutions Consulting, GAN Integrity.

2023-10-04

- Third-party risk information is more often than not stored in different platforms and owned by different risk owners with little or poor infrastructure connecting stakeholders and data, in turn, leading to a flawed business risk management strategy
- In this session, we explore how weaving risk information across categories, processes and platforms together will build a complete view of third-party risk, pre and post onboarding
- Our speakers will look at the prerequisites of a resilient third-party risk management plan and how compliance teams can navigate a fluid risk environment with the help of scalable technology
