

Relying on Someone Else's IRB: Why, When, and How for Hospitals and Academic Medical Centers Relying on Someone Else's IRB: Why, When, and How for Hospitals and Academic Medical Centers

Amy Waltz, Associate Director, Human Subjects Office, Indiana University. **Bethany Johnson**, University Director, HRPP, Indiana University.

June 11, 2019

- Why IRB reliance is valuable: the landscape of IRB reliance including the NIH single IRB policy, why it matters, and what it means for hospitals and academic medical centers
- When you should rely: defining your institutional risk tolerance and when you should accept an external IRB's review, drafting your institutional policy for reliance, and identifying the information you need to rely.
- How to rely: understanding the responsibilities of your institution, investigators, and IRB and implementing processes to fulfill them; drafting reliance agreements based on your risk tolerance; collecting and providing local context information.
