How to Maintain an Enterprise-Wide Security and Compliance Strategy in a Decentralized Model

Ken Reiher, VP, Operations, ComplyAssistant. **Dana Penny**, Chief Compliance Officer, The New Jewish Home.

September 22, 2020

- Understand key traits and the complexity of an enterprise-wide security and compliance strategy, and how to create an overarching vision, even within a decentralized IT governance model.

- Hear real-world best practices to manage security and compliance across disparate departments and geographic locations, by encouraging non-IT teams to become invested in, and advocate for, enterprise-wide security practices

- Learn strategies to keep your executive team and board of directors informed and educated about cybersecurity and compliance issues, to avoid budget surprises and to allocate appropriate spending and resource decision-making

- Discuss future-proofing your enterprise-wide strategy by starting to think and plan for thoughtful, controlled growth, telehealth and digital care, medical device cybersecurity and artificial intelligence
